

How to ensure the size you order is correct

Use our custom measuring tool to confirm what size you need to order. Just print our tool, cut it out, then wrap the tool around the tip of your chair leg to determine what size will work. In addition to our standard size increments, we've also added labeled size ranges for our Clear Sleeve and Replacement Chair Tip products, so you can order with confidence.

Printing instructions

To ensure that your printed tool will provide accurate measurements, make sure the "Scale" option on your printer settings is turned off or set to 100%.

Ensure Proper Printing

If printed correctly, the line below should be one inch long.
